

Canada: COVID-19 Stats for 2020

Population:	37,742,154
Covid-19 deaths	19,328
Death from all causes	300310
2020 Increase of death from yr before	12,850
82% of all COVID death are in long-term care	15,849
COVID death in general populaton (outside LTC)	3,479
COVID death in general populaton (%)	0.0092%
Death per 100,000 in general population	9.22
Approximate number of suicides per yr	10,000
Traffic fatalities in 2018 per 100,000	5.2
Is an increase in total death of 12,850 abnormal?	
Since 2000 the change in death has ranged from a decrease of 4,420 to an increase of 13,110.	
Increase in 2015	13,110
Increase in 2017	12,150

Summary

Lockdowns do not prevent the deaths in LTC
 COVID death apart from LTC is minimal (3,479)
 If total COVID death of 19,328 is correct, then there was a decrease in death from all causes of 6,478. (COVID deaths - deaths from all causes)
 That is unlikely which means that the number attributed to COVID death is false.
 Is it reasonable to lock down the country for 3,479 non LTC death? Is it possible that the misery due to the lockdowns has caused more damage in increased suicides and other problems caused by the lockdowns?
 COVID does not appear to be the epidemic. The epidemic is fear that has been created by a false narrative.

Year	Death	Increase	Population	Death %	Increase %
2000	217,230		30,588,383	0.71%	
2001	219,110	1,880	30,880,073	0.71%	0.00%
2002	220,490	1,380	31,178,263	0.71%	0.00%
2003	223,910	3,420	31,488,048	0.71%	0.00%
2004	228,830	4,920	31,815,494	0.72%	0.01%
2005	229,910	1,080	32,164,309	0.71%	0.00%
2006	225,490	-4,420	32,536,987	0.69%	-0.02%
2007	233,830	8,340	32,930,794	0.71%	0.02%
2008	236,530	2,700	33,337,638	0.71%	0.00%
2009	237,710	1,180	33,746,093	0.70%	-0.01%
2010	237,140	-570	34,147,564	0.69%	-0.01%
2011	245,500	8,360	34,539,159	0.71%	0.02%
2012	242,410	-3,090	34,922,030	0.69%	-0.02%
2013	251,660	9,250	35,296,528	0.71%	0.02%
2014	253,050	1,390	35,664,337	0.71%	0.00%
2015	266,160	13,110	36,026,676	0.74%	0.03%
2016	262,090	-4,070	36,382,944	0.72%	-0.02%
2017	274,240	12,150	36,732,095	0.75%	0.03%
2018	283,770	9,530	37,074,562	0.77%	0.02%
2019	287,460	3,690	37,411,047	0.77%	0.00%
2020	300,310	12,850	37,742,154	0.80%	0.03%

Bottom line

The deaths in the general population do not merit the measures that are being taken.

The death in the LTC facilities are not being addressed by the lockdowns.
